Project Stakeholder Register

Peshawari Chappal E-Commerce Platform with AI Computer Vision Foot Sizing

Type	Stakeholder	Key Interests & Objectives
Internal	Project Lead / Full-Stack Developer	System architecture, API integration, milestone delivery, and FYP academic evaluation.
Internal	AI / Computer Vision Developer	Accuracy of foot sizing (<3mm error margin), image processing speed, and A4 detection reliability.
Internal	Frontend Developer	Responsive UI/UX, product catalog navigation, seamless checkout, and camera scanning interface.
Internal	Academic Supervisor & Committee	Methodology compliance, research validity, documentation standards, and FYP defense grading.
Internal	Store Owner / Sponsor	Online sales conversion, order management, reduced return rates due to sizing, and revenue analytics.
Internal	Master Artisans / Craftsmen	Receiving precise foot millimeter measurements and clear order specifications for crafting.
Internal	Quality Assurance (QA) Engineer	Cross-browser testing, zero critical bugs in payment/order flows, and data security.
External	End Customers / Footwear Buyers	Simple shopping experience, accurate custom shoe sizing without store visits, and reliable delivery.
External	Logistics & Courier Partners	Accurate customer shipping addresses, automated tracking labels, and smooth COD cash reconciliation.
External	Payment Gateway Providers	Secure transactions, low fraud risk, PCI-DSS compliance, and instant payment settlement.

External	Cloud & Hosting Providers	Server uptime (99.9%), database availability, and predictable cloud resource consumption.
External	Leather & Material Suppliers	Consistent demand for genuine leather hides, quality soles, and metal hardware.
External	Tax & Regulatory Authorities	Transparent digital invoicing, sales tax compliance (FBR/PRA), and fair customer refund policies.
